

The Bell Tower Project

Stage 2 Let it ring!

The Christ Church bell has been silent
for 3 years
Can you help to make it ring again?

A lot of work needs to be done to restore the bell tower. We have already made access to the tower safe from the inside by installing new landings, securing staircases and adding modern, industrial quality ladders.

Stage 2

Stonework needs to be repaired and cracks filled to assure that no stone falls, and that vibration from the bell and passing vehicles does not rapidly worsen the condition of this nearly 130-year-old tower.

The required work is difficult and expensive as it needs heritage skills, work at considerable height, lifting equipment and qualified/certified workers. Also, the entire scope of works will not be clear until work has begun.

The plan

Prioritise ONE WEEK of work on the tower focussing on the outside. Do vital work to secure stone and enable the bell to be rung. More work may be possible!

Estimated cost \$10,000

Can you help with this cost?

- Speak with Rick Fisher (or call on 0409 800680)
- Place a donation in a clearly marked envelope and place in collection plate or give to our office staff.
